WHO AM I?

I am a very curious guy, passionate about learning daily. I'm interested in life and the lessons I can learn from it. Attitudes like teamwork, perseverance and passion define me as a person. Aptitudes are developed from that foundation onward. I value spending time with myself and get to know and shape who I want to become.

EXPERIENCE

2018 – Current
Full time

QA Engineer

Wave Location Technologies

My role is to ensure the quality of every app under the company's name. To accomplish this, I have implemented a end-to-end test automation framework. I also do manual testing.

Ruby / Bash / Jenkins / Linux / Gherkin / Appium

2017 – 2018
part time

Game developer

Project Nyama

Working as a Game developer with some friends from University. My role was to program the enemy's tracking and attack algorithms.

Unity / C#

EDUCATION

2014 – 2018

Bachelor's Degree

U-TAD

I studied Software Engineering here. The Degree is very practically focused. This means I have had a hands on approach to everything I have learned here.

1998 – 2013

A-Levels

The Lady Elizabeth School

I went to this school when I was 3 years old and finished studying there at 17, when I went to University. This is a English School, meaning I have grown up with English around me constantly.

PERSONALITY

Currently

ISFP

Myers and Briggs'

I focus on the job at hand, always prioritising people relations first. I want everybody to feel secure and accepted. I tend to pause for a better answer. Self-improvement is always on my To-Do list. Less is more.

LANGUAGES

Spanish - native
Catalan - native
English - Proficient

HOBBIES

I play around with GNU/Linux (Arch + i3) and configure my system to be more efficient. Whenever I need time for myself, I will go for a walk. This helps me organise my ideas. I also enjoy photography. I think of it as my creative expression. When I need a bit of an adrenaline rush, I will go for a ride with my bicycle.

OPEN SOURCE

I believe Software should be Open Source as it serves as a learning platform for aspiring developers as much as a community effort to break current boundaries and limitations. In our day and age, no commercial product would be feasible without relying on quality Open Source projects.
